

State of North Carolina

ROY COOPER
GOVERNOR

North Carolina Education Cabinet
Statement of Support
April 17, 2019

WHEREAS, the economic future of our state depends on a highly skilled workforce, and all North Carolinians need access to the education and training required for career success; and

WHEREAS, as North Carolina's economy grows, the vast majority of new jobs will require education beyond a high school diploma; and

WHEREAS, fewer than half of North Carolinians from ages twenty-five through forty-four have a high-quality postsecondary degree or credential; and

WHEREAS, the myFutureNC Commission, established in 2017, brought together leaders in education, business, philanthropy, faith-based, and nonprofit communities to establish an education attainment goal for North Carolina that will help ensure that our economy will continue to grow and our people will continue to thrive; and

WHEREAS, the myFutureNC Commission has set a statewide goal of two million working-age North Carolinians (twenty-five through forty-four years old) with a degree or credential beyond high school by 2030; and

WHEREAS, to achieve that goal, our state must work to strengthen education from early childhood through K-12 to postsecondary education and the workforce so that students graduate prepared for the jobs of today and tomorrow; and

WHEREAS, pursuant to N.C. Gen. Stat. § 116C-3, the North Carolina Education Cabinet is tasked with developing and maintaining a strategic design for the continuum of education programs across the state;

NOW, THEREFORE, the undersigned members of the North Carolina Education Cabinet do hereby:

- Endorse the myFutureNC Commission's goal to increase the number of North Carolina residents ages twenty-five through forty-four who hold postsecondary credentials or degrees to at least two million, or sixty-six percent, by 2030; and
- Commit to pursuing policies and programs within North Carolina that will help our state achieve that goal; and
- Call on the myFutureNC Commission to track the state's progress toward reaching the goal and report annually to the North Carolina Education Cabinet on that progress.
