EXECUTIVE ORDER NO. 245

EXTENDING CERTAIN HEALTH AND HUMAN SERVICES PROVISIONS IN
PREVIOUS EXECUTIVE ORDERS AND DELEGATIONS OF AUTHORITY

WHEREAS, on March 10, 2020, the undersigned issued Executive Order No. 116, 34 N.C. Reg. 1744-1749 (April 1, 2020), which declared a State of Emergency to coordinate the state’s response and protective actions to address the Coronavirus Disease 2019 (“COVID-19”) public health emergency and to provide for the health, safety, and welfare of residents and visitors located in North Carolina; and

WHEREAS, on March 13, 2020, the President of the United States issued an emergency declaration for all states, tribes, territories, and the District of Columbia, retroactive to March 1, 2020, and the President declared that the COVID-19 pandemic in the United States constitutes a national emergency; and

WHEREAS, on March 25, 2020, the President approved a Major Disaster Declaration, FEMA-4487-DR, for the State of North Carolina; and

WHEREAS, COVID-19 continues to infect thousands of North Carolinians every day, and a State of Emergency remains in place for the purpose of maintaining the state’s ability to meet challenges presented by COVID-19; and

WHEREAS, there have been more than one million seven hundred sixty-three thousand (1,763,000) cases of COVID-19 in North Carolina, and more than nineteen thousand five hundred (19,500) people in North Carolina have died from the disease; and

WHEREAS, all 100 North Carolina counties are classified as high or substantial transmission areas by the Centers for Disease Control and Prevention (“CDC”); and

WHEREAS, as COVID-19 has continued to spread from person to person across the United States and world, variants (genetically distinct strains) of COVID-19 have developed; and

WHEREAS, the Delta variant, due to its increased transmissibility, became the most common form of COVID-19 in North Carolina beginning summer 2021; and

WHEREAS, new variants of the virus continue to develop, including the Omicron variant, which has been labeled a “variant of concern” by the World Health Organization, and which is more
transmissible than the original COVID-19 variant and the highly transmissible Delta variant, according to preliminary evidence; and

WHEREAS, the Omicron variant is now spreading across the state; and

WHEREAS, the state’s public health experts have expressed concern that the state is seeing an increase in COVID-19 cases and associated hospitalizations from the rapidly increasing spread of the Omicron variant; and

WHEREAS, as of the date of this Executive Order, the percent of emergency department visits for COVID-like illness, the daily number of newly diagnosed cases, the number of hospitalizations for COVID-like illness, and percentage of positive tests out of all tests are all increasing rapidly; and

WHEREAS, although the Omicron variant represents a severe threat to the unvaccinated, current evidence suggests that being fully vaccinated reduces the risk of becoming severely ill, requiring hospitalization, or dying; and

WHEREAS, in Executive Order Nos. 130, 139 and 152, the undersigned, with the concurrence of the Council of State, determined that the Secretary of the North Carolina Department of Health and Human Services (the “Secretary”) required authority to modify or waive enforcement of certain legal constraints or regulations which restrict the immediate relief of human suffering; and

WHEREAS, certain provisions of Executive Order Nos. 130 and 139 were extended by Executive Order Nos. 144, 148, 152, 165, 177, 193, 211, 225, and 236 but these provisions are set to expire unless the undersigned takes further action; and

WHEREAS, the undersigned, in consultation with the North Carolina Department of Health and Human Services (“NCDHHS”) has determined that, due to the progress the state has made in combating the pandemic, certain measures in Executive Orders Nos. 130 and 139 can be rescinded; and

WHEREAS, the undersigned, in consultation with NCDHHS, has determined that certain waivers concerning childcare, Medicaid, and social services are no longer required; and

WHEREAS, to ensure that the state’s health care system can effectively respond to the surge in COVID-19 cases and associated hospitalizations caused by the Omicron and Delta variants, and for the other reasons specified herein, it is anticipated that the need for the remaining measures in Executive Orders Nos. 130 and 139 will continue for at least a period of ninety (90) days; and

COVID-19 Vaccinations in North Carolina

WHEREAS, until enough North Carolinians are vaccinated, COVID-19 will continue to cause devastating illness and death; and

WHEREAS, rigorous clinical trials have demonstrated that the FDA-authorized and approved COVID-19 vaccinations are safe and effective, and that the known and potential benefits of the FDA-authorized and approved COVID-19 vaccines outweigh the known and potential harms of contracting the COVID-19 virus; and

WHEREAS, safe and effective COVID-19 vaccines help protect people from severe illness, hospitalization and death and slow the spread of viral transmission and higher rates of COVID-19 vaccination in a community are associated with reduced hospitalizations and deaths; and

WHEREAS, the vaccine is free to all North Carolinians, regardless of insurance status; and

WHEREAS, COVID-19 vaccines are now readily available for children ages five (5) and above; and

Regulatory Flexibility to Address COVID-19: Prohibitions on Excessive Pricing

WHEREAS, North Carolina and its mental health, developmental disabilities, and substance abuse facilities and service providers need to take all reasonable actions to expand capacity to improve
the ability to efficiently respond to the COVID-19 pandemic, thereby reducing the probability that the demand for care in North Carolina will outpace capacity; and

WHEREAS, in some cases, these actions have required and will continue to require temporarily waiving or modifying legal and regulatory constraints so that these mental health, developmental disability, and substance abuse facilities and service providers can maintain licensure and continue to provide necessary services; and

WHEREAS, decisions about adding and transferring resources continue to require real-time decision-making; and

WHEREAS, to continue to enable rapid decision-making, the undersigned has determined that it is in the best interest of the people of North Carolina to provide the Secretary with authority to modify or waive enforcement of certain legal and regulatory constraints as necessary in order to expand capacity and save lives; and

WHEREAS, for example, health care providers are needed to administer the COVID-19 vaccine, however, many individuals with medical training are not authorized to administer vaccines due to licensing requirements; accordingly, the undersigned wishes to remove any such barriers which would prevent or impair the ability of these medical personnel from assisting with vaccine administration; and

WHEREAS, to prevent barriers to vaccine administration, it is also critically important that those administering the vaccine, and those providing their property and facilities for purposes of vaccine administration, are provided with insulation from liability to the maximum extent permitted by law; and

WHEREAS, the process of vaccinating North Carolinians to levels sufficient to protect the population requires comprehensive and aggressive statewide efforts together with robust community participation; and

WHEREAS, accordingly, state officials are directed to marshal all available state property, equipment, and personnel towards facilitating the statewide vaccination effort; and

WHEREAS, the State Health Director has been assigned authority by the Secretary, pursuant to N.C. Gen. Stat. § 130A-3, to exercise authorities under N.C. Gen. Stat. § 130A-5, including to investigate the causes of communicable disease affecting the public health in order to control and prevent those diseases, to provide, under the rules of the North Carolina Commission for Public Health, for the prevention, detection, reporting, and control of communicable diseases, and to develop and carry out health programs necessary for the protection and promotion of the public health and the control of diseases; and

WHEREAS, in Executive Order No. 236, the undersigned directed the State Health Director, in addition to and according to her authority in N.C. Gen. Stat. 130A, to issue any statewide standing order needed in her medical judgement to facilitate COVID-19 testing, vaccination, and monoclonal antibodies; and

WHEREAS, the undersigned desires that the statewide standing orders for COVID-19 testing, vaccination, and monoclonal antibody treatment continue through the effective date of this Executive Order and desires to expand the use of such orders to cover other therapeutics authorized or approved for treatment and prevention of COVID-19; and

WHEREAS, the surge in COVID-19 cases and associated hospitalizations leaves North Carolinians vulnerable to price gouging on consumer goods needed to diagnose and treat COVID-19 and to respond to the pandemic, and the prohibitions on excessive pricing are in effect through the duration of this Executive Order; and
